

► Hygienic, specialised flooring solutions for a range of internal and external areas within...

HEALTHCARE FACILITIES

www.flowcrete.co.uk

Welcome to Flowcrete UK

The construction and refurbishment of a range of healthcare facilities is steadily increasing in both public and private sectors, including new high-tech hospitals, aged care facilities and local medical centres.

Floor safety remains a key concern in the design of these facilities. Factors such as slip resistance requirements, lighting needs, levels of foot traffic and the frequency of cleaning regimes all affect the selection of a suitable safe flooring solution. Smooth, impervious, seamless applications are a common necessity for healthcare environments as these surfaces are easily cleanable and help healthcare facilities to maintain a high level of hygiene.

Flowcrete UK understands these requirements and has hygienic, specialised flooring solutions for a range of internal and external areas within hospitals, aged care or medical facilities.

Salmonella Typhi	~
MRSA	~
Enterococcus Faecalis	~
E-coli	~
Staphylococcus Aureus	~
Listeria	~
Streptococcus Pyogenes	~
C.difficile	~
Pseudomonas Aeruginosa	~
Proteus Vulgaris	~
Campila Bacta	~

Polygiene® has been proven effective in both dry and wet zones, with some systems avaliable with UV stable formulations.

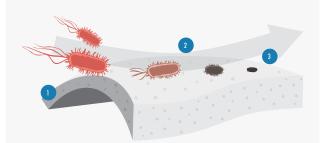

HACCP International Certified Hygienic Flooring

A healthcare facility's floor is subject to heavy traffic and impact damage due to plant machinery in clean room environments and dropped equipment.

Resin flooring systems including epoxy, polyurethane MMA systems, ensure a non-porous, smooth and seamless surface where there is nowhere for bacteria or mould spores to grow.

Flowcrete UK's HACCP International and ISO 22196 certified polyurethane flooring materials offer enhanced protection with the inclusion of Polygiene®, a silver-ion antimicrobial agent, designed to protect the surface from degradation caused by microbial growth.

How Does Polygiene® Work?

The silver ions are distributed throughout the floor.

2 The silver ions migrate to the surface.

They inhibit bacteria growth by penetrating the cell membrane.

Performance Benefits

	Seamless	and	hygienic
--	----------	-----	----------

✓ Fast curing

- ✓ Cost effective
- ✓ Easy to clear
- ✓ Resistant to chemicals and bodily fluids including blood
- ✓ Decorative

* A detailed chemical resistance chart is available upon request for all Flowcrete systems. Please contact your local Technical Department for further assistance.

Flowcoat SF41 (0.35 mm)

A high performance, solvent free epoxy resin coating that can deliver an anti-slip profile by inclusion of graded aggregate between coats. Flowcoat SF41 is also hard wearing against sustained forklift traffic, as well as chemical and abrasion resistant.

SERVICE AREAS, LAUNDRIES

Standard Colours

SLIP RESISTANCE		
BS 7976-2 (typical values for 4-S rubber slider)	Dry > 40	
WEAR RESISTANCE		
EN 13892-5	Abrasion quantity <1 cm ²	
IMPACT RESISTANCE		
EN ISO 6272	10 N/m	

Flowcoat CR is available for additional chemical resistance. Please contact your local Flowcrete representative for further information. A full technical profile is available at www.flowcrete.co.uk

Flowshield FX (2–3 mm)	Flows	hielc	I FX	(2–3 mm)
------------------------	--------------	-------	------	----------

A solvent-free, self-smoothing, epoxy resin, combined with decorative coloured particles. This hard wearing system is available in a matt or silk finish and provides excellent abrasion, UV and chemical resistance.

CONSULTATION ROOMS, FOYERS, INTERNAL CORRIDORS

Standard Colours

WEAR RESISTANCE		
EN ISO 5470-1	< 3000mg	
SHORE D HARDNESS		
DIN 53505	Approx. 90	
SLIP RESISTANCE		
BS 7976-2	Dry > 40 Low slip potential	

Flowfresh MF (4-6 mm)

A medium duty chemically resistant, antimicrobial treated polyurethane resin finish. The non-tainting, non-dusting surface provides an easy-to-clean surface with impressive durability under traffic and heavy machinery.

CLEAN ROOMS

Standard Colours

TEMPERATURE RESISTANCE		
Tolerant to intermittent spillages up to 70°C or sustained heat from -20°C to 60°C		
COMPRESSIVE STRENGTH		
EN 13892-2 55 N/mm ²		
IMPACT RESISTANCE		
EN ISO 6272	15 Nm	

TEMPERATURE RESISTANCE (6MM)		
Tolerant to intermittent spillages up to 60°C or sustained heat from -20°C to 50°C		
WATER PERMEABILITY		
Karsten Test Nil-Impermeable		
SLIP RESISTANCE		
BS 7976-2	Dry > 40 low slip potential	

Flowfresh SR (5-6 mm)

A heavy duty, chemical resistant antimicrobial treated polyurethane resin floor screed system. Attractive positively textured coloured floor finish with anti slip properties. Ideal for wet processing zones such as food manufacturing and food preparation areas.

CATERING KITCHENS

Standard Colours

Flowfast Terrosso (4 mm)

A seamless, decorative methyl methacrylate floor system with coloured flakes that delivers visual impact alongside high performance, under a quick turnaround. Curing in as little as one hour after application, Flowfast Terrosso has been developed to enable fast track installation.

CONSULTATION ROOMS, FOYERS, INTERNAL CORRIDORS, EXTERNAL WALKWAYS

SPEED OF CURE		
Walk on	1 hour	
Full traffic & chemical cure	2–3 hours	
COMPRESSIVE STRENGTH		
EN 13892-2	60 N/mm ²	
SLIP RESISTANCE		
BS 7976-2	Dry > 40 Low slip potential	

Flowfast Quartz Structure/Wet areas also avaliable. Please contact your local Flowcrete representative for further information. A full technical profile is available at www.flowcrete.co.uk

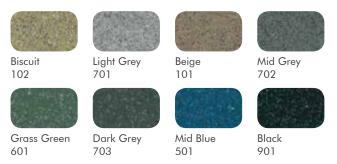

TEMPERATURE RESISTANCE		
Tolerant of sustained temperatures up to 50°C		
SLIP RESISTANCE		
BS 7976-2	Dry > 40 low slip potential	
SPEED OF CURE		
Walk on	1 hour	
Full traffic & chemical cure	2–3 hours	

Flowfast Quartz (4 mm)

A hard wearing, decorative and very fast curing MMA flooring system that delivers a decorative matt finish. Flowfast Quartz consists of durable colour stable quartz granules encapsulated in a clear resin binder and delivers a fully trafficable surface just 60 minutes from application.

CATERING KITCHENS, EXTERNAL WALKWAYS

Standard Colours

Mondéco Flooring

Flowcrete UK's seamless terrazzo flooring range, Mondéco, is the ultimate flooring choice for commercial environments owing to its eye-catching and durable finish.

This impressive flooring solution is the first-choice for architects, specifiers and flooring professionals across the globe. Offering a mix of aggregates ranging from sparkling crystal mirror glass right through to tough flint and granite chippings, the Mondéco range is the designer's dream for all interior flooring projects.

Perhaps the greatest benefit of terrazzo for architects and interior designers is how flexible the material can be in terms of its application. Mondéco can be installed in a variety of complicated patterns and precision cut forms using brass or aluminium trims, which are laid on the surface of the floor in a matrix that designates each area of the design.

Application Suitability

Foyers

Comfort Flooring

Flowcrete's range of Comfort resin flooring provides the cushioned properties typically associated with vinyl but with the additional benefits of a seamless, hygienic and durable resin floor.

The seamless, impervious nature of these resin floors makes them easy to clean, which means that they are well-suited to environments with strict hygiene requirements. Flowcrete's floors are able to retain a crack-free finish for the long term, avoiding the need for frequent repairs or early refurbishments in order to provide a solution that is not just functional, but which is also economical.

Interior air quality is a key concern for the operators of large-scale commercial or public buildings. The Comfort Resins range meets the M1 emission classification for building materials, which is the lowest emission class there is. When compared with many alternative flooring materials, the Comfort Resins range more effectively limits the amount of volatile organic compounds (VOCs), as well as other toxins, that occur in the environment.

Application Suitability

Consultation Rooms

Clean Rooms

Internal Corridors

Deckshield ID (2-3 mm)

A low VOC, flexible, solvent free polyurethane car park deck coating system for intermediate decks of multi storey structures. Deckshield ID cosmetically enhances and reduces noise, making multi storey car parks brighter, safer environments to visit.

SERVICE AREAS, LAUNDRIES, CAR PARKS

Standard Colours

Tile Red

Traffic Blue

SLIP / SKID RESISTANCE		
EN 13036-4	Class I: >40 units wet tested Class II: >40 units dry tested	
IMPACT RESISTANCE	·	
EN ISO 6272-1	Class II: ≥10 Nm	
ABRASION RESISTANCE		
EN ISO 5470-1	Weight loss < 3000mg using H22 wheel, 1000 cycles, load 1000g	

Deckshield Rapide ID is available for fast track applications. Please contact your local Flowcrete representative for further information. A full technical profile is available at www.flowcrete.co.uk

REACTION TO FIRE		
B _{f1} - S1		
CRACK BRIDGING ABILITY		
Class A5 (-20°C)		
Class 4.2 (-20°C)		
ARTIFICIAL WEATHERING		
No blistering, no cracking and no flaking after 2000h of accelerated UV exposure.		

Deckshield Rapide ED is available for fast track applications. Please contact your local Flowcrete representative for further information. A full technical profile is available at www.flowcrete.co.uk

Deckshield ED (3-4 mm)

A low VOC, solvent free and crack-bridging car park deck coating system. Designed to provide a colourful, watertight and hard-wearing surface for exposed or roof level decks of multi-storey car parking structures.

EXTERNAL WALKWAYS, CAR PARKS

Standard Colours

Traffic Purple

Traffic Blue

Dark Grey

Tile Red

Naturewalk Pave (12-18 mm)

A seamless and slip resistant resin bound gravel system used to hard landscape outdoor areas. Naturewalk Pave offers a seamless alternative to block paving, eliminates the cracks where weeds can grow and provides a durable replacement for loose stone or gravel.

EXTERNAL WALKWAYS

Standard Colours

Silver Grey

Ash Stone

Rhinestone

Ash Grey

SLIP RESISTANCE

(EN 13036-4)

Class I: >40 units wet tested Class II: >40 units dry tested

Nil (Impermeable)

WATER PERMEABILITY

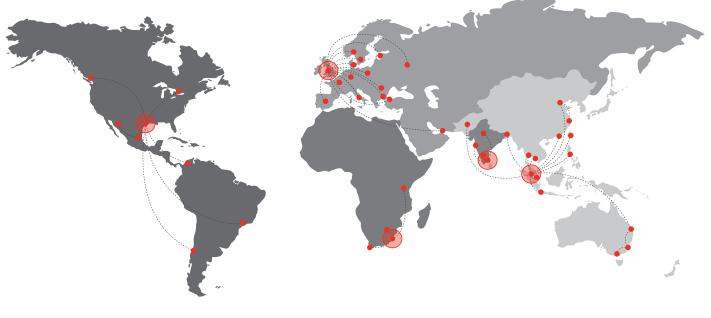

Karsten Test

ABRASION RESISTANCE

Dependant on aggregate selection. Use bauxite for heavier duty wear and vehicular traffic.
