

INTRODUCING...

FLOWFAST MMA FLOORING

To minimize downtime and disruption to operations, Flowfast – Flowcrete UK's range of fast-cure MMA floor finishes – cures in just 60 minutes!

This fast track MMA flooring solution is available in a range of colours and finishes and is suitable for use in both commercial and industrial premises.

Methyl methacrylate technology results in fast track cure times.

Available in a range of flaked, quartz & solid colour swatches.

Resistant to a range of chemicals & cleaning agents.

Suitable for industrial or commercial applications.

Tailored slip-resistant profile for safety underfoot.

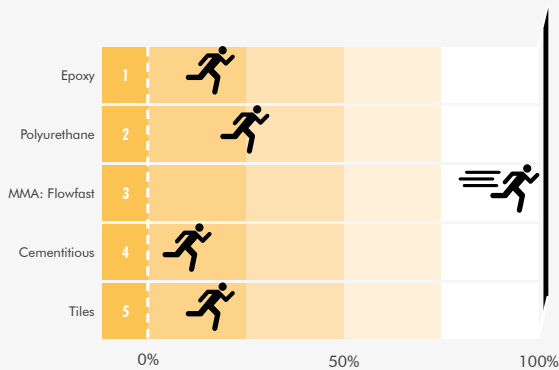

Formulations available that are suitable for wet areas.

WHICH FLOWFAST MMA FLOORING SYSTEMS ARE AVAILABLE?

Flowfast System	Thickness	Description
Flowfast Quartz Classic	4 mm	A hand-trowelled, hard wearing, satin-finish floor topping made up of colour stable quartz granules in a clear acrylic resin binder, that cures in two hours.
Flowfast Quartz Classic for wet areas	5 mm	A hand-trowelled, satin-finish resin floor topping that cures in two hours and features a positively textured finish to reduce the risk of slips in wet conditions.
Flowfast Quartz Structure	4 mm	A fast track, hard wearing scatter and seal resin floor system with a textured satin finish and decorative quartz granules.
Flowfast SHF	4 mm	A lightly textured, flaked floor topping for communal walkways and balconies in social housing, minimising disturbance during installation.
Flowfast Terrosso	4 mm	A seamless, decorative, hard wearing flaked floor finish developed for high traffic retail environments. Available with 1–3 mm or 5–7 mm flakes.

GOING FOR GOLD!

When comparing the materials' speed of cure with other flooring types, Flowfast goes for gold!

WHAT'S THAT SMELL?

MMA flooring does exhibit a distinct odour in its wet state (not dissimilar from that of Super Glue), however MMA flooring is extremely low in VOC's. During installation this odour can be completely eliminated with the right ventilation program in place.

Once cured the odour disappears rapidly. Once this issue has been managed and overcome MMA flooring can achieve results that are not possible with other resin systems and is widely utilised in airports, kitchens, leisure facilities, fast food outlets, stores and supermarkets.

FLOWFAST MMA FLOORING APPLICATION SUITABILITY

Retail & Shopping Malls

Healthcare Facilities

Public Spaces & Leisure Facilities
